COTTON CHATS

TRADE-MARK REG. U.S. PAT. OFF.

DRAPER CORPORATION

HOPEDALE MASS.

NO. 191. SEPTEMBER 1918.

FIGHTING FOURTH BONDS

for the period from September 28 to October 19 have thrown all other subjects into a total eclipse.

To support the war we must have men for our Army and Navy and the cost must be financed.

The men are already provided and money to the amount of

6 000 000 000

dollars must be forthcoming to pay those in the field and provide for others now on the way.

There is no alternative as to the expense,—the only choice is between lending the money to the government on the best security on earth, with a good rate of interest, or paying the bill directly by taxes which will affect everyone down to the smallest wage earner.

Meantime and—for all time

LOYALTY
IS THE WATCHWORD.

To keep our boys at the front and support them when they get there many things are essential.

ESSENTIALS

are being produced in a way that would have been impossible without the

NORTHROP LOOM
TRADE-MARK

For instance, the aeroplane service is provided with machines covered with cloth woven on Northrop looms,—and the men have uniforms woven on Northrop looms.

In the Army the soldiers are clad in goods woven on Northrop looms; they sleep in tents made of duck from Northrop looms under Northrop loom blankets; they use Northrop loom bath towels; Northrop loom powder bags hold the powder used in our artillery.

In the Navy our sailors have Northrop loom blankets; Northrop loom towels; and Northrop loom garments.

Northrop loom cloth finished for raincoats protects all branches of the service from the weather.

Northrop loom surgeon's gauze, and bandage cloth are indispensable when wounded.

Northrop loom gas masks protect our boys from poisonous gases.

As the

POWER BEHIND THE THRONE

often settles the fate of nations, support of OUR ARMY, OUR NAVY and FLOCKS OF FLYERS is furnished through the patriotic efforts of the cotton and worsted manufacturers of this country through the instrumentality of

NORTHROP LOOMS
